

UITS Network Group Wireless Network

Quick Setup Guide – Mac OS X 10.7 and later

This is a quick configuration guide for connecting Mac OS X 10.7 and later to the UMass eduroam wireless network.

You can check your version of Mac OS X by clicking the Apple logo in the top left and choosing 'About this Mac'.

If you are not from The UMass President's Office you will need to contact your home institution for assistance,

Select the Wireless symbol from the menu bar (see image 1). When within range the **eduroam** Network will be displayed. Click to connect. A login box will be displayed (see image 2).

1. You will be prompted to enter your credentials:

NOTE: You will be asked to enter your username and password during the connection process.

You must enter your UMass email address as your username (e.g. **idoe@umassp.edu**)

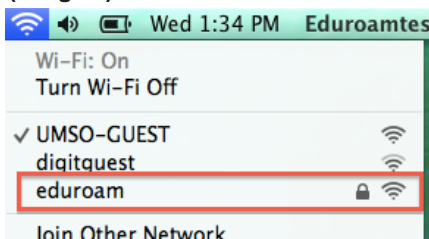

Username: **email address**

Password: **domain password**

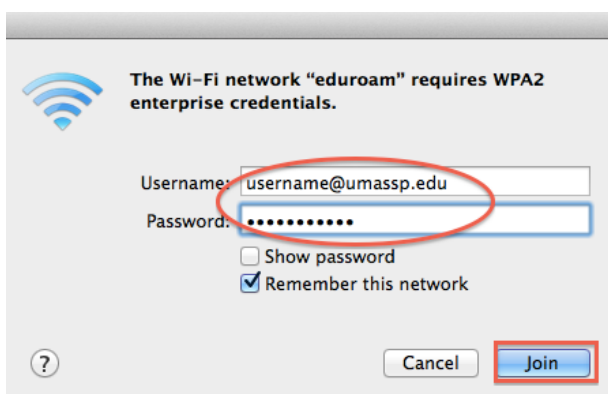

Remember the Network: **select**

2. Click **Join** (see image 2).
3. Accept the certificate "**clearpassvip.umassp.edu**" by clicking **Continue**.
4. If prompted please use your computer user name and password.

(image 1)

(image 2)

5. You should now be connected to **eduroam**
