

– Windows 10 Quick Setup Guide

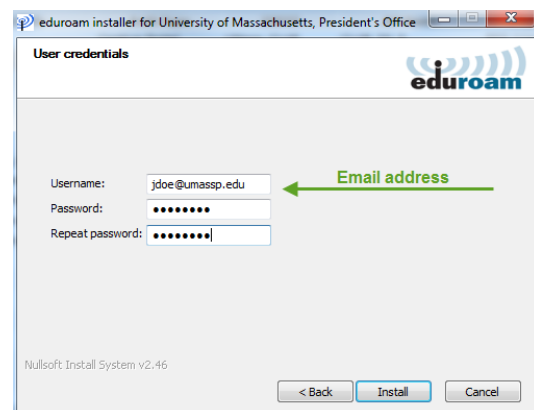

This is a quick configuration guide for connecting Windows 10 to the UMass eduroam wireless network.

Note: If you are not from the UMass President's Office you will need to contact your home institution for assistance.

1. You will be emailed a .zip file that contains an installer program that will configure your wireless settings for you.
4. Open the zip file and run the .exe program
5. You may receive a WinZip Caution. Click **Yes** to proceed
6. Welcome to the Eduroam Installer will appear. Click **Next**. The installer will state it will only work if you are a member of the University of Massachusetts, President's Office. Click **OK** to continue with installation.

NOTE: You will be asked to enter your username and password during the next step in the installation process.

You must enter your UMassp email address as your username (e.g. **jdoe@umassp.edu**)

7. Click **Install** once you enter your credentials
8. Once you see Installation Complete
9. Click **Finish**.
10. You can now select the eduroam network in your wireless settings.
