Brief Overview
What is UM-Plan? And what is AppStream?
UM-Plan is a cloud based software product purchased by the University for the purposes of budgeting and forecasting. At the time of implementation, UM-Plan provides minimal support for Mac based users. In an effort to provide this product offering to our Mac based user community, the University has elected to utilize a product on Amazon (AWS) called AppStream.

AppStream offers the ability to stream published applications down to the user through a web browser. What this means is that you (the user) would be able to access UM-Plan through a web browser on any device.

Logging on for the first time
To launch UM-Plan on AppStream, go to the https://www.umassp.edu/um-plan page.

You will be taken to the UM-Plan launch page. Select the ‘UM-Plan Login (for Macs)’ hyperlink under the Login section.

![UM-Plan Launch Page](image)

You will see a familiar logon screen. Go ahead and enter your regular UMass credentials here. Remember to select the appropriate domain from the list:
Next you will be redirected to a page that looks similar to the following:

Go ahead and click on the “E” icon with the word UM-Plan written below it. The other icon is for Amherst users only.

Next, a session for UM-Plan will be allocated for you. You will see a progress graphic indicating that your resource is starting up.
Next, you will see an option for campus. Go ahead and select your campus.

You will be prompted to login using your email address and password to Office 365:

You will be redirected to UM-Plan.
AppStream Environment Quick Reference

When using UM-Plan on AppStream you will notice a number of icons

The Grid Icon
(or waffle as it is politely referred to in some circles) provides you with a list of applications you have access to within AppStream. At the time of this document, only UM-Plan is available, so that is likely all you will see.
The Switch Windows Icon
This would be used if you were running more applications than just AppStream. This gives you the ability to toggle between them from within a browser window.

The Folder icon
Allows you to upload and download files from within your session.

The Clipboard icon
Allows you to copy things like text in or out of your session.
The System icon
Allows you to manage a few system settings related to your session.

The Full Screen icon
Allows you to expand your viewing area to a full screen view.

The Profile icon
Allows you to end your session. This is the recommended action when you are done working with UM-Plan for the day.
