

The University of Massachusetts was established in 1863 as the Massachusetts Agricultural College, located at Amherst. It became known as the Massachusetts State College in 1932 and in 1947 became the University of Massachusetts. The Medical School and Boston campuses were established in 1962 and 1964, respectively. The Lowell and Dartmouth campuses (previously the University of Lowell and Southeastern Massachusetts University, respectively) were consolidated into the University under Chapter 142 of the Acts of 1991. The University is governed by a single Board of Trustees composed of 19 voting members and three non-voting members. The president of the University oversees the five-campus system, and each campus is led by a chancellor.

UMass Amherst is the original and largest campus of the University system and the most comprehensive in terms of the breadth and depth of its academic programs. The system's flagship campus, UMass Amherst, is home to Commonwealth Honors College, which has taken its place alongside the finest public honors colleges in the nation. Even as the campus incorporates modern teaching methods involving new communication and information technology, it remains an immersive, residential campus serving predominantly full-time students who learn from peers as well as professors. True to its Land Grant roots, the campus is engaged in research and creative work in all fields. UMass Amherst is a Carnegie Foundation for the Advancement of Teaching "Research Universities with Very High Activity" institution, based on its research expenditures in a wide variety of basic and applied research and development areas.

UMass Boston is nationally recognized as a model of excellence among urban public research universities. Located on Boston Harbor, it is the metropolitan area's only public research university. UMass Boston's most distinguished intellectual contributions are in the social sciences, education, health and wellness, and the exact sciences, with faculty earning national and international recognition in biology; environmental, earth, and ocean sciences; cancer research; brain sciences; green chemistry; and disability studies. UMass Boston, home to more than 12,000 undergraduate and more than 4,000 graduate students, attracts a diverse population. Students have roots in more than 140 countries and speak more than 90 different languages. Many are of modest-income backgrounds and are first-generation college students. In 2014, UMass Boston celebrated its 50th anniversary and a half-century of commitment to providing superior education, standing with and serving Massachusetts' capital city, and making a difference.

UMass Dartmouth distinguishes itself as a vibrant public research university dedicated to engaged learning and innovative research, resulting in the lifelong success of its more than 9,000 students and more than 40,000 alumni. The University serves as an intellectual catalyst for global, national and regional economic, social and cultural transformation. Highly ranked among national peers by *Washington Monthly* for improving the social mobility of its students, UMass Dartmouth offers more than 80 undergraduate and graduate degree and certificate programs, including 11 at the doctoral level, the only public law school in Massachusetts, and a growing portfolio of online offerings. UMass Dartmouth is rated among the Top 1 percent of universities and colleges nationwide on the President's National Higher Education Honor Roll for Community Service, with its students contributing nearly 200,000 hours of service to the South Coast region. Two-thirds of UMass Dartmouth students graduate with service learning experience.

UMass Lowell, a nationally recognized doctoral research university, is the fastest-growing of the five campuses. Since 2007, UMass Lowell has achieved significant enrollment growth while simultaneously increasing the academic qualifications and diversity of its student body. National recognition of the campus is on the rise. *U.S. News & World Report* ranks UMass Lowell No.156 in the National Universities Rankings, and its 27-spot climb over five years from No.183 is among the fastest in the nation. UMass Lowell programs support workforce and economic development through innovation, entrepreneurship and public-private partnerships. The university prepares its more than 17,000 students to be work ready, life ready and world ready, emphasizing experiential learning through cooperative education, service and research. UMass Lowell's alumni earn the top starting and mid-career salaries of graduates of New England's public research universities and receive the 10th best return on education investment among all public institutions in the nation.

UMass Medical School (UMMS) is the Commonwealth's only public medical school. Situated in Worcester, UMMS serves as the University's Nobel Prize-winning health sciences campus. Perennially ranked in the Top 10 percent for primary care training, UMMS has remained true to its founding mission while also becoming globally recognized in biomedical research. Today, UMMS shares a tripartite mission focused on education, research and health care delivery with its clinical partner, UMass Memorial Health Care. UMMS is home to more than 1,100 graduate students spread among the School of Medicine, Graduate School of Biomedical Sciences and Graduate School of Nursing, and includes nearly 600 residents and fellows, and renowned faculty, including a Nobel Laureate, a Lasker Award recipient, six Howard Hughes Investigators and five National Academy members. UMMS's burgeoning research enterprise, recognized for its world-class RNA-based gene-silencing expertise, attracts nearly \$250 million in annual research awards.

UMassOnline is the University's online education program, providing technology and brand marketing support for 132 fully accredited, fully online degree and certificate programs originating from the University's campuses, as well as 13 blended programs that combine traditional classroom setting with online learning. Online programs provide the same academic quality and rigor as their classroom counterparts and are nationally recognized. UMassOnline offers more than 1,500 online courses annually, drawing from the academic disciplines for which UMass has received national and international acclaim. The 63,000 UMassOnline course registrations represent students from across the nation and around the world.
